1. АННОТАЦИЯ ДИСЦИПЛИНЫ

“No matter how many times you turned around a coin, you never saw the other side as the other side. The coin had a dark side that was seemingly irreducible. This irreducibility could easily apply to the ways in which another object, say a speck of dust, interacted with the coin. If you thought this through a little more, you saw that all objects were in some sense irreducibly withdrawn.” - Timothy Morton, Hyperobjects.

A thing or object, proposes Morton - known to many as a figurehead in the school known to some as “Objected Oriented Ontology” (OOO) - cannot be known in its totality. “You can’t know a thing fully by thinking it or by eating it or by measuring it or by painting it . . .” In this way, objects are radically withdrawn, not fully graspable in their totality even by themselves. As such, our project of study cannot only proceed from what a thing is, but also how it is. In this course, we will explore the (1) idea of thingliness: Can object include subject? What is a thing?

How does it endure in time? and (2) its inscrutability: If there is a radically withdrawn aspect to all things, how can we think this component of their dark silence? Many contemporary fields of scholarship have proceeded from this question, and what unites them is their redress to questions (1) and (2) - namely how can we consolidate our thinking of thingliness with thingliness itself? As such, we’ll proceed from a variety of points of view, from the philosophy of time to ecological thought to black studies to psychoanalysis, in order to approach this speculative question.

4.1 Текущий контроль

Оценка за курс складывается из следующих видов заданий текущего контроля:

READING QUIZZES - 25% of final grade

To increase your familiarity and confidence with the material, you will complete daily quizzes (or brief, informal tests) based on the readings for the course.

CLASS PARTICIPATION - 25% of final grade

Participation in a seminar course is critical for creating a positive learning environment as well as comprehending the material. It is especially vital for success in one's education, as we tend to learn more as we engage more. To this end, students will be expected to take an active part in class meetings. This requires that we come to class having read course materials and ready to ask questions of one another about them and that we come to class ready to meaningfully engage with one another.

1. "Correlationism consists in disqualifying the claim that it is possible to consider the realms of subjectivity and objectivity independently of one another. Not only does it become necessary to insist that we never grasp an object 'in itself, in isolation from its relation to the

subject, but it also becomes necessary to maintain that we can never grasp a subject that would not always- already be related to an object.” (Quentin Meillassoux, *After Finitude*, 16.)

2. “Perhaps this is as factual as I know: In any investigatory procedure concerning African American culture, a given episteme fractures into negative and positive stresses that could be designated the crisis of inquiry that reveals where a kind of abandonment we could also call it a gap has occurred. Rather than running straight ahead toward a goal, the positivity (a given theoretical instrument) loops back and forward at once. For example, the notion of substitutive identity, not named as such in the literature of sociocultural critique, is analogous to the more familiar concept of negation.” (Hortense Spillers, “All the Things You Could Be by Now if Sigmund Freud’s Wife Was Your Mother,” 711.)

3. “Is it that hyperobjects seem to push this work of humiliation to a yet more extreme limit? What is this limit? Copernicus, it is said, is all about displacement. This was first taken to mean an exhilarating jump into cognitive hyperspace. But what if the hyperobjects force us to forget even this exit strategy? What if hyperobjects finally force us to realize the truth of the word humiliation itself, which means being brought low, being brought down to earth? Hyperobjects, in effect, seem to push us into a double displacement.” (Timothy Morton, *Hyperobjects*, 17.)
